S.

S A B

S, Has in Engliſh the ſame hiſſing ſound as in other languages, and unhappily prevails in ſo many of our words that it produces in the ear of a foreigner a continued ſibilation.

In the beginning of words it has invariably its natural and genuine ſound: in the middle it is ſometimes uttered with a ſtronger appulſe of the tongue to the palate, like *z*; as *roſe*, *roſeate*, *roſy*, *oſier*, *noſel*, *reſident*, *buſy*, *buſineſs*. It ſometimes keeps its natural ſound; as *looſe*, *deſignation*; for which I know not whether any rules can be given.

In the end of monoſyllables it is ſometimes *s*, as in *this*; and ſometimes *z*, as in *as*, *has*; and generally where *es* ſtands in verbs for *eth*, as *gives*. It ſeems to be eſtabliſhed as a rule, that no noun ſingular ſhould end with *ſ* ſingle: therefore in words written with diphthongs, and naturally long, an *e* is nevertheleſs added at the end, as *gooſe*, *houſe*; and where the ſyllable is ſhort the *ſ* is doubled, and was once *ſſe*, as *aſs*, anciently *aſſe*; *wilderneſs*, anciently *wilderneſſe*; *diſtreſs*, anciently *diſtreſſe*.

Vary'd with ſacred hymns and acts of love;

SA'FFRON. *n. ſ.* [*ſafran*, French, from *ſaphar*, Arabick. It was yellow, according to *Davies* in his Welſh dictionary. *Crocus*, Latin.]

It hath a flower conſiſting of one leaf, which is ſhaped like a lily, fiſtulous underneath, the tube widening into ſix ſegments, and reſting on the footſtalk: the pointal riſes out of the bottom of the flower, and is divided into three-headed or creſted capillaments; but the empalement afterwards turns to an oblong triangular fruit, divided into three cells, full of roundiſh ſeeds. It hath a tuberoſe root, and long nervous graſſy leaves, with a longitudinal furrow through the middle of each. There are Spring-flowering crocuſes, and thoſe which flower in Autumn. Their ſeeds are ripe about the latter end of April: the time of planting is in July. About the beginning of September they begin to ſpire, and ſometime after appear the ſaffron flowers, which are gathered as well before as after they are full-blown; and the moſt proper time for this is early in the morning: the chives being all picked out of the flowers, the next labour about them is to dry them on the kiln: at firſt they give it a pretty ſtrong heat. The charges and profits attending the culture of ſaffron, have been computed in the following manner: the rent of an acre of ground, and the expence of manuring it, is reckoned at twenty-three pounds: the value of twenty-ſix pounds of ſaffron, the computed produce of an acre in three years, is, at a mean, ſuppoſed to be thirty-nine pounds; and conſequently the neat profits of an acre of ground, producing ſaffron, will in three years amount to ſixteen pounds. *Miller.*

SELF. *pronoun.* plur. *ſelves.* [*ſilba*, Gothick; ſylf, ſylfa, Sax. *ſelf*, *ſelve*, Dutch.]

1. Its primary ſignification ſeems to be that of an adjective: very; particular; this above others; ſometimes, one's own.

Shoot another arrow that *ſelf* way
Which you did ſhoot the firſt. *Shakeſp.*

Took off her life. *Shakeſpeare.*

At that *ſelf* moment enters Palamon
The gate of Venus. *Dryden.*

2. It is united both to the perſonal pronouns, and to the neutral pronoun *it*, and is always added when they are uſed reciprocally, or return upon themſelves: as, *I did not hurt* him, *he hurt* himſelf; *the people hiſs* me, *but I clap* myſelf; *thou loveſt* thyſelf, *though the world ſcorns* thee.

Self is that conſcious thinking thing, which is ſenſible or conſcious of pleaſure and pain, capable of happineſs and miſery, and ſo is concerned for *itſelf*, as far as that conſciouſneſs extends. *Locke.*

3. It is ſometimes uſed emphatically in the nominative caſe: as, *myſelf* will decide it; I *myſelf* will come; *himſelf* ſhall revenge it. This uſe of *ſelf*, thus compounded, without the pronoun perſonal, is chiefly poetical.

Compounded with *him*, a pronoun ſubſtantive, *ſelf* is in appearance an adjective: joined to *my*, *thy*, *our*, *your*, pronoun adjectives, it ſeems a ſubſtantive. Even when compounded with *him* it is at laſt found to be a ſubſtantive, by its variation in the plural, contrary to the nature of Engliſh adjectives, as *himſelf*, *themſelves*.

5. *Myſelf*, *himſelf*, *themſelves*, and the reſt, may, contrary to the analogy of *my*, *him*, *them*, be uſed as nominatives.

6. It often adds only emphaſis and force to the pronoun with which it is compounded.

Next to the knowledge of God, this knowledge of our *ſelves* ſeems moſt worthy of our endeavour. *Hale.*

The fondneſs we have for ſelf, and the relation which other things have to our *ſelves*, furniſhes another long rank of prejudices. *Watts.*

7. It ſignifies the individual, as ſubject to his own contemplation or action.

The ſpark of noble courage now awake,
And ſtrive your excellent *ſelf* to excel. *Spenſer.*

Since conſciouſneſs always accompanies thinking, and it is that that makes every one to be what he calls *ſelf*, and thereby diſtinguiſhes himſelf from all other thinking things; in this alone conſiſts perſonal identity, *i. e.* the ſameneſs of a rational being. *Locke.*

It is by the conſciouſneſs it has of its preſent thoughts and actions, that it is *ſelf* to it *ſelf* now, and ſo will be the ſame *ſelf*, as far as the ſame conſciouſneſs can extend to actions paſt or to come. *Locke.*

8. It is much uſed in compoſition, which it is proper to explain by a train of examples. It is to be obſerved, that its compoſition in *Shakeſpeare* is often harſh.
